

Abimbola Balogun

With over 5 years of experience in JavaScript, React and React Native. I specialize in building and maintaining web and mobile applications for thousands of users. My focus includes application security, responsiveness, and scalability. I also excel in pre-sales product demonstrations, managing prospect requirements, and handling trial orientations and walkthroughs to ensure a seamless and informative experience for potential clients. As a team player with strong communication skills, I am committed to creating effective solutions that align with business needs.

Relevant Experience

Frontend Engineer at **Nylene Canada ULC** July 2024 — Present

- Developed and maintained company's website to improve user experience, product visibility and customer engagement.
- Implemented responsive UI designs using React, Typescript, HTML, CSS, and JavaScript to ensure seamless display across desktop and mobile devices.
- Optimized website performance by reducing load times, improving accessibility, and implementing best practices for SEO.
- Integrated APIs and third-party services to connect the website with product databases, inventory management, and customer portals.
- Collaborated with backend developers to design and implement efficient data retrieval and display mechanisms.
- Developed interactive features such as product configurators, search filters, and real-time pricing updates to enhance customer experience.
- Worked closely with the marketing team to implement website updates, landing pages, and promotional content for campaigns.
- Ensured cross-browser compatibility and performed UI/UX testing to fix bugs and improve usability.
- Maintained security best practices, including data validation and protection against common vulnerabilities (e.g., XSS, CSRF).
- Used version control (Git/GitHub/GitLab) to manage code changes and collaborate with the development team.

Full stack Engineer at **OnePort365** Feb 2020 — April 2024

- Co-Led a cross-functional team to develop West Africa's first digital freight forwarding, management application, serving 10,000+ clients.
- Developed a comprehensive booking system for freight forwarding using Typescript for the front-end development, allowing customers to select shipment types (Import/Export) and desired services including Ocean Freight, Haulage, Air Freight, Custom Brokerage and Warehousing.
- Showcased the capabilities and benefits of OnePort 365's products through engaging and informative demonstrations to prospective partners.
- Built, styled, and shipped high quality websites, design systems, mobile apps, and cross platform.
- Lead trial orientations and walkthroughs, highlighting OnePort 365's strengths and capabilities, to help potential partners make informed decisions.
- Championed the setup and configuration of a React based application, accurately, translating complex designs into functional interfaces, architecting optimized database schemas, and crafting robust API endpoints.
- Implemented an integrated invoicing feature and seamlessly integrated with QuickBooks, enhancing financial management capabilities, and streamlining finance operations for the team.
- Provided design and configuration best practices to partners when deploying OnePort 365's products to their networks, ensuring optimal performance and customer satisfaction.
- Provided leadership within engineering department through close collaboration, building tools to improve developer experience, and mentorship.
- Assessed and addressed client requirements during product deployment, ensuring a seamless application experience.
- Implemented a highly developed GraphQL APIs for a high-traffic e-commerce web applications, improving data retrieval efficiency by 30% as well as building GraphQL queries and mutations to streamline data access, resulting in a 25% reduction in backend response times.
- Created intuitive admin dashboards for e-commerce and e-Library applications, improving user management and data analysis, resulting in a 30% boost in productivity and data-driven decision-making.
- Crafted professional and responsive websites for corporate firms, showcasing their brand identity and driving online presence, resulting in a 40% increase in website traffic and user engagement.
- Engineered a web application for dispatch operations, integrating Google Maps for precise geolocation services, optimizing delivery efficiency by 25% and reducing, transportation costs by 15%.

Skills

Programming Languages

HTML5, CSS3, JavaScript (ES6), TypeScript, Sass, Python, Java, PHP, GraphQL

Libraries & Frameworks

React, Redux, React Native, VueJs, Vuex, Next.js, Gatsby, Node.js, Express.js, AngularJS, Tailwind CSS, Styled Components, Laravel, Code Igniter Jest, Bootstrap

Tools & Platforms

Git, GitHub, BitBucket, Netlify, Vercel, Heroku, Digital Ocean, AWS, Firebase, Storybook, Webpack, Figma, MongoDB, phpMyAdmin, HTTP, Restful APIs, Context API, ReactQuery, JQuery, Babel, Storybook, Ajax, Postgres

Miscellaneous

Agile and Scrum Fundamentals, Market Research, SSL/OAuth, MacOS, Caching, DOM, UI/UX Design, Restful, NPM, Linux

Selected Projects

OnePort365

A comprehensive booking system for global freight forwarding, primarily using TypeScript, React, Tailwind CSS, and Node.js.

Mayfair Studio Designs

To think forward, do more collaborative designs for a better future.

Abimbola's Website

Personal website built with Gatsby and deployed on netlify.

Education

University Of Lagos.

Bachelor Of Science in Process Engineering.

Lighthouse Labs

Diploma in Web Development.

Interests

Web Accessibility, Anime, Gaming
